### Notes:

1. 10 March and 7 April this spring are already set and were notified to all boat owners in late summer 2016.
2. In October 2018 there are very few weekend dates with suitable tides. 20 October is the only viable weekend date and that is not ideal, so we have decided to lift on Friday 19 October as well when tides are very good.
3. 17 November 2018, 16 March and 13 April 2019 all have excellent tides.
4. Please assume there will be a work party at 16.00 hrs on the day before each lift.
5. In the event of bad weather any of these dates may change, although we have only had to delay a lift once in the last three years so keep your fingers crossed.
