

Mooring rope set up.

Notes

Do not splice an eye on your mooring ropes.
(if the buoy sinks you will find it difficult to remove the eye from your cleat).

Tie off the mooring ropes with figures of eight and a locker.

The pick up rope should be able to be set on either side of the boat.

The boat should be able to be moored facing either direction dependant on wind and tide.

Make sure you connect all 4 mooring ropes to the pick up rope before you depart!
